

The World Renowned Teenage Net

About Us

In the mid 1950's several Hams from Michigan got together and started a net. Each was a Teenager, hence the name "The Teenage Net"

Sadly the original charter members are now all Silent Keys, but to their credit, the Teenage Net continues with daily check-ins of about 22 on average.

Why has it continued so long with a decent following with the average age of the check-ins now at about 67.5 yrs?

Most likely the term "Teenager" brings back vivid memories of our past that was exciting and good, recall:

As a Teenager, we started into competitive sports, had our first date, first kiss, and learned how to drive a car. Not bad for examining a period in our lifetime, it is still in many respects the same with the new Teenagers going through their period of good times.

Now having our Teenagers check-in at ages of 80, 82, and 90 plus, we reflect from time to time and discuss events going back that bring back the nostalgia that prevailed when we were all Teenagers.

In the main we meet daily on 3.945 mostly because we enjoy each other's company, share our joy and sorrows, support one another in our endeavors, and are thankful for the many friends made as a result of the Teenage Net.

As you read this, join us if you like, I am sure you will be welcome with us, and too become a regular check in with our many other Teenage friends.

We encourage ALL ages to check in, the younger members of the Amateur Radio Service, will be the ones carrying on the tradition of the Net.
